

The screenshot shows a web browser window for the KimiAI Pro application. The URL is `localhost:8503`. The interface has a dark theme.

Left Sidebar:

- Theme:** A radio button for "Light" is selected.
- Select Model:** A dropdown menu is open, showing "moonshotai/kimi-k2...".
- User Information:** Shows "Logged in as HemantKimi" and a "Logout" button.
- Workspace:** A section for creating new projects.

 - New Project Name input field.
 - Create Project** button.

- Select Project:** A dropdown menu showing "Default Project".

Central Workspace:

- KimiAI Bot** title.
- Designed & Developed by Hemant Katta
- Please enter your message here...** input field.

Bottom:

- Windows taskbar with various pinned icons.
- System tray icons: battery (6), search, file explorer, edge browser, chrome, task manager, power, volume, network, language (ENG IN), date (16-02-2026), and time (21:49).

Hey! I'm Kimi, a large language model trained by Moonshot AI. I can:

- Answer questions, explain concepts, brainstorm ideas
- Draft emails, essays, code, social-media posts, etc.
- Summarize or translate text, solve math problems, help with study plans
- Role-play conversations, generate trivia, recommend books/movies, and more

Think of me as a friendly, know-it-all brain in your pocket—just ask!

This screenshot shows the KimiAI Bot interface running on a local host. The left sidebar features a 'Theme' section with 'Light' selected, a 'Select Model' dropdown set to 'moonshotai/kimi-k2...', and a 'Logout' button. Below these are sections for 'Workspace' (with a 'New Project Name' field), 'Create Project', 'Select Project' (set to 'Default Project'), and a notification icon with a '6' count. The main area has a teal header with the title 'KimiAI Bot' and a sub-header 'Designed & Developed by ❤️ Hemant Katta ❤️'. It includes a greeting message 'Hello! 🤖 What can I help you with today?' and a large text block detailing the bot's capabilities. A message input field at the bottom is labeled 'Please enter your message here...' with a send arrow icon. The bottom right corner shows system status icons like battery level, signal strength, and date/time (16-02-2024).

The screenshot shows the KimiAI Pro application running in a browser window. The left sidebar is dark-themed and includes sections for 'Theme' (Light selected), 'Select Model' (moonshotai/kimi-k2...), and 'Workspace'. The main area has a light-themed header with tabs for 'Connect device' and 'KimiAI Pro'. The 'KimiAI Pro' tab is active, displaying the AI's自我介绍 (Who're you & what can you do) and a list of capabilities. It also features a 'What can you do' section with a list of tasks and a message input field.

Who're you & what can you do 🤖

Hey! I'm Kimi, a large language model trained by Moonshot AI. I can:

- Answer questions, explain concepts, brainstorm ideas
- Draft emails, essays, code, social-media posts, etc.
- Summarize or translate text, solve math problems, help with study plans
- Role-play conversations, generate trivia, recommend books/movies, and more

Think of me as a friendly, know-it-all brain in your pocket—just ask!

What can you do 🤖

Quick snapshot of what I can do for you:

1. Answer questions – trivia, science, history, tech, pop-culture, you name it.
2. Explain & teach – break any topic into plain-English (or another language) step-by-step.
3. Write & edit – emails, essays, résumés, stories, poems, ad copy, code, SQL, LaTeX...
4. Translate & localize – 20+ languages, dialect tweaks, cultural context.

Quick snapshot of what I can do for you:

1. Answer questions – trivia, science, history, tech, pop-culture, you name it.
2. Explain & teach – break any topic into plain-English (or another language) step-by-step.
3. Write & edit – emails, essays, résumés, stories, poems, ad copy, code, SQL, LaTeX...
4. Translate & localize – 20+ languages, dialect tweaks, cultural context.
5. Summarize – articles, PDFs, YouTube transcripts, long threads.
6. Brainstorm – names, plots, business ideas, research angles, dinner plans.
7. Study help – flashcards, quizzes, problem walk-throughs (math, chem, econ, etc.).
8. Code helper – generate, debug, comment, optimize; speak Python, JS, C++, Java, Go, Bash, HTML/CSS, SQL...
9. Data & docs – CSV/JSON cleaning, regex, Excel formulas, Markdown/LaTeX tables.
10. Role-play – interviewer, D&D DM, customer, language-partner, therapist-style chat (non-clinical).
11. Creative fun – pickup lines, jokes, trivia games, horoscopes, short bedtime stories.
12. Productivity – todo outlines, travel itineraries, meeting agendas, polite “no” emails.
13. File & image vision (when enabled) – describe pics, read diagrams, OCR text.
14. Voice & tone shifts – formal, casual, Gen-Z, Shakespeare, pirate, emoji overload ✅ 🎉.
15. Continuous chats – remember facts you’ve told me within the same thread for follow-ups.

Just ask for what you need; if I can’t do it, I’ll say so.

What are the latest tech news 📰

Here are some of the biggest tech stories that broke in the past 24-48 h (as of 12 Jun 2024):

1. Apple goes all-in on "Apple Intelligence"
 - At WWDC 2024 Apple unveiled its on-device + cloud AI stack (Apple Intelligence) coming to iOS 18, iPadOS 18 and macOS 15.
 - Deep integration with Siri, Writing Tools, Image Playground, Genemoji and a partnership with OpenAI for ChatGPT-powered queries when Siri can't answer.
 - Most models run ≤3B parameters on Apple silicon; larger requests are shunted to "Private Cloud Compute" servers built on Apple silicon with end-to-end crypto.
2. Elon Musk threatens to ban Apple devices at his companies
 - Immediately after the OpenAI integration news, Musk posted that if Apple "integrates OpenAI at the OS level" it would be "an unacceptable security violation" and said visitors would have to leave Apple devices in a Faraday cage.
 - Tim Cook replied that the system is opt-in per request and no data is retained by OpenAI.
3. Nvidia passes the US\$3 trillion mark, briefly dethrones Apple as 2nd-most-valuable public company
 - Stock up ~150 % YTD; 10-for-1 split completed Monday.
 - New "Rubin" GPU architecture teased for 2025 (successor to Blackwell) and Nvidia Inference Microservices (NIM) to let enterprises drop-containerized models on any CUDA GPU.

4. Microsoft Recall (AI screenshot memory) now "off by default"
• After backlash over privacy/security, Microsoft says Recall will ship as opt-in on Copilot+ PCs and require Windows Hello enrollment.
• New encrypted search database and filter lists for apps like Edge InPrivate.

5. Tesla shareholders to re-vote on Musk's US\$56B pay package
• Delaware judge voided the package; Tesla is asking retail investors to re-approve at 13 Jun annual meeting; board says needed to keep Musk focused.
• Proxy advisers ISS & Glass Lewis recommend "against"; result expected late Thu.

6. EU finalises €1.2B fine for Meta (Facebook) over 2023 GDPR transfers
• Largest GDPR penalty to date; stems from 2020 Schrems-II ruling on US data transfers.
• Meta says will appeal; plans to start shifting EU users to new "EU-US Data Framework" this summer.

7. Google DeepMind's "V2A" model makes AI soundtracks for video
• New diffusion-based system generates music, Foley and dialogue that auto-syncs to on-screen action; early demo clips look impressive but not yet public.

8. Amazon's Project Kuiper signs first telco resale deal with Verizon
• 3,200-satellite constellation to provide backhaul for rural 4G/5G cells; beta service slated 2025, full 2026.
• Amazon also awarded 77 Atlas-V launches from ULA (the final Atlases before Vulcan takes over).

9. TSMC confirms 1.6 nm (A16) node for 2026 with backside-power delivery

9. TSMC confirms 1.6 nm (A16) node for 2026 with backside-power delivery
• Claims 8-10 % speed gain and 15-20 % power drop vs 2 nm; first customer: Apple for iPhone 18 SoC.

10. European Parliament passes AI Act texts; final Council sign-off expected July
• Foundation-model rules kick in 12 months after entry into force; GPT models >10²³ FLOPs must do systemic-risk evals, cybersecurity testing and allow EU access.

11. Adobe rolls out "Photoshop AI" web beta with generative-fill free tier
• No subscription needed for limited use; files live in the cloud and can open native .psd.

12. Epic Games wins partial appeal vs Apple in US 9th Circuit
• Court upholds 2021 injunction forcing Apple to let apps link out to external payment sites; Apple's request for a stay denied—changes must stay in effect while Supreme Court appeal pending.

13. Samsung's 2024 smart TVs get "Daily+" free ad-supported AI news channel
• Uses AI anchors generated from text feeds in 7 languages; rolling out in US & Korea first.

14. Volkswagen inks US\$8B deal with Rivian for EV tech & software JV • VW invests initially US\$1B (convertible note) and another US\$4B through 2026; gives VW access to Rivian's "network-over-the-air" zonal E/E architecture.

15. Arm debuts "CSS for Client" 2024 platform
• Ready-made 3nm IP cluster (Cortex-X925, A725, Immortalis-G925 GPU) with Arm's own physical-implementation package; partners claim 30 % perf/W jump vs off-the-shelf 2023 cores.

Speech of
Nirmala Sitharaman
Minister of Finance
July 23, 2024
Hon'ble Speaker,
I present the Budget for 2024 -25.
Introduction

1. The people of India have reposed their faith in the government led by the Hon'ble Prime Minister Shri Narendra Modi and re-elected it for a historic third term under his leadership. We are grateful for their support, faith and trust in our policies. We are determined to ensure that all Indians, regardless of religion, caste, gender and age, make substantial progress in realising their life goals and aspirations.

Global Context

2. The global economy, while performing better than expected, is still in the grip of policy uncertainties. Elevated asset prices, political uncertainties and shipping disruptions continue to pose significant downside risks for growth and upside risks to inflation.

3. In this context, India's economic growth continues to be the shining exception and will remain so in the years ahead. India's inflation continues to be low, stable and moving towards the 4 per cent target. Core inflation (non-food, non-fuel) currently is 3.1 per cent. Steps are being taken to ensure supplies of perishable goods reach market adequately. 2

Interim Budget

4. As mentioned in the interim budget, we need to focus on 4 major castes, namely 'Garib' (Poor), 'Mahilaven' (Women), 'Yuva' (Youth) and

Interim Budget

4. As mentioned in the interim budget, we need to focus on 4 major castes, namely 'Garib' (Poor), 'Mahilayen' (Women), 'Yuva' (Youth) and 'Annadata' (Farmer). For Annadata, we announced higher Minimum Support Prices a month ago for all major crops, delivering on the promise of at least a 50 per cent margin over costs. Pradhan Mantri Garib Kalyan Anna Yojana was extended for five years, benefitting more than 80 crore people.

5. Administrative actions for approval and implementation of various schemes announced in the interim budget are well underway. The required allocations have been made.

Budget Theme

6. Turning attention to the full year and beyond, in this budget, we particularly focus on employment, skilling, MSMEs, and the middle class. I am happy to announce the Prime Minister's package of 5 schemes and initiatives to facilitate employment, skilling and other opportunities for 4.1 crore youth over a 5-year period with a central outlay of

2 lakh crore. I will speak about them shortly, while more details may be seen in the annexure. This year

1.48 lakh crore for education, employment and skilling.

Budget Priorities

7. The people have given a unique opportunity to our government to take the country on the path of strong development and all-round prosperity. In the interim budget, we promised to present a detailed roadmap for our pursuit of 'Viksit Bharat'. In line with the strategy set out in the interim budget, this budget envisages sustained efforts on the following 9 priorities for generating ample opportunities for all.

1. Productivity and resilience in Agriculture

This screenshot shows the KimiAI Pro web interface. On the left, there's a sidebar with various buttons: 'New Chat', 'Select Chat' (set to 'Chat 1'), 'Clear Chat', 'Upload TXT/PDF', a file upload area for 'budget_spec...', 'Export TXT', and 'Save JSON'. The main content area has a header with 'assistant.' and a list of numbered items from 2 to 9. Below the list is a green message bubble from the AI. At the bottom is a red-bordered input field with placeholder text. The browser's address bar shows 'localhost:8503'. The system tray at the bottom right includes icons for battery, signal, volume, and date/time (16-02-2026).
